SUMMARY

Computer Science graduate with hands-on experience independently building and deploying both development and production Magento 2 eCommerce platforms. Experienced in web development, Linux server administration, Magento infrastructure, SEO optimization, chatbot integration and large-scale product catalog management.

EXPERIENCE

Software & Web Developer Intern | World of Weld Supply Pte Ltd, Singapore (Apr 2026 - Aug 2026)

- Independently built and deployed a Magento 2 eCommerce platform from scratch.
- Configured Linux hosting, OpenSearch and Magento production infrastructure.
- Customized the Porto theme and developed responsive frontend components.
- Executed development-to-production website migration and SEO improvements.
- Integrated AI chatbot functionality and improved user experience.
- Managed 5,000+ product records, product imports and catalog organization.

PROJECTS

Employee Monitoring System (Diploma Final Year IoT Project)

- Developed a Python-based monitoring solution using Raspberry Pi and Pi Camera.
- Implemented real-time monitoring, motion detection and dashboard reporting.

Smart Home Monitoring System (IoT Project)

- Built an IoT platform for sensor-based environmental monitoring.
- Developed web-based visualization and real-time data collection features.
